"Reducing Risk and Improving Outcomes in Indigenous Peoples with Chronic Kidney Disease and Type 2 Diabetes."

Throughout this program, participants will be able to:

- ✦ Identify genetic, social and environmental factors leading to the epidemic of CKD in Indigenous peoples with diabetes.
- ✦ Outline health disparities affecting care, risk and outcomes through case-based discussion.
- ✦ Explore novel solutions to improve care with consideration to access, resources, diagnosis, treatment and outcomes.

SPEAKERS

Dr. Paul Komenda, MD, FRCPC (Nephrologist)
Professor of Medicine and Community Health Sciences
Max Rady College of Medicine, University of Manitoba.
Research Director, Chronic Disease Innovation Centre
Seven Oaks Hospital

Dr. Jeff Winterstein, MD, M.Sc., B.Sc, B.A
General Internal Medicine specialist and diabetologist
serving over 8 First Nations communities.

**Please join us for an upcoming
virtual learning program:**

How to treat ASCVD and Familial Hypercholesterolemia (FH) using the 2021 Dyslipidemia Guidelines to lower LDL.

Familial hypercholesterolemia is an autosomal co-dominant genetic disorder resulting in highly elevated levels of LDL cholesterol, putting patients at significant risks of cardiovascular disease. Please join us in an online learning program:

Wednesday April 28 6:30pm -7:45pm MDT

6:15pm-Log in

6:30pm-Presentation

7:15pm-Questions 7:45pm-Close

Featuring:

Dr. Norman Wong B.Sc. (Hon), M.Sc., M.D., F.R.C.P.(C)

Departments of Medicine and Biochemistry & Molecular Biology Faculty of Medicine University of Calgary; Diabetes & Endocrinology Research Group

Director, Libin Gene Therapy Unit; Research interests in familial hypercholesterolemia (FH)

The objectives of this session are to:

- Describe the prevalence, genetics, inheritance patterns, and high cardiovascular risk of heterozygous familial hypercholesterolemia (HeFH)
- Recognize the low rates of diagnosis and the clinical findings of HeFH
- Discuss how to screen, diagnose and treat HeFH
- Discuss the application of the learnings from HeFH to treating ASCVD
