

# Training Checklist

## Technical introduction to the YpsoPump® system

### Training

Patient Name \_\_\_\_\_

Address \_\_\_\_\_

E-mail \_\_\_\_\_

Date of Birth \_\_\_\_\_

Serial Number YpsoPump® \_\_\_\_\_

LOT Number YpsoPump® \_\_\_\_\_

### Training Program: Please check the topics covered.

The certified trainer confirms that a full training, including practical exercises, has been provided. The patient confirms that the intended use and safe application of the YpsoPump® system have been fully understood. Please check where applicable.

#### General

- Content of YpsoPump® Starter Kit
- YpsoPump® system components
- How to wear the pump
- Warranty provisions
- Watertightness
- 24-hour service and order procedure
- Pump insurance and replacement terms

#### Operation

- Function button
- Navigation
- User interface

#### Putting into Operation

- Inserting a battery and performing the self-test
- Setting time of day and date
- Inserting a reservoir
- Priming the infusion set

#### Run and Stop Modes

- Put the pump in run and stop mode

#### Basal Rate

- Programming **both** basal rate profiles A & B
- Changing the basal rate profile
- Switching basal rate profile
- Activating and cancelling the temporary basal rate function
- Setting and changing the basal rate limit

#### Bolus (bolus calculator is in app)

- Setting and changing the bolus increment
- Setting and cancelling the standard bolus
- Setting and cancelling the extended bolus
- Setting and cancelling the combination bolus
- Activating/deactivating blind bolus function
- Setting and cancelling the blind bolus
- All bolus functions have correctly been performed by the trainee
- Setting and changing the bolus limit

**Caution:** Knowledge of medical products, such as insulin pumps, and appropriate training of their use are indispensable prerequisites for responsible diabetes management. Starting insulin pump therapy without the proper training can jeopardise your health and put you at serious risk. For this reason, the Ypsomed Pump® system must not be used without the appropriate instruction and explicit approval of your health care professional or diabetes team. If the doctor has not issued any therapy-related set-up parameters, the training will be carried out using examples. All the information will be treated in confidence and used only for the purposes of documentation by Ypsomed Canada Inc. The information will be used exclusively by Ypsomed Canada Inc. and/or your certified trainer and will not be shared with other parties.
